SENTRA

2026 · CLIENT EDITION

FOR THE BOARD · FOR THE DECISION MAKERS

The Business Case for Sentra.

How we help enterprises across the USA, EU, and UK save millions in operational waste, eliminate security exposure, and unlock growth — without another disappointing vendor engagement.

$2.1M+	40%	12 wks
AVG. CLIENT SAVING	FEWER INCIDENTS	TYPICAL GO-LIVE

EXECUTIVE SUMMARY

The Business Problem, In Plain Terms.

Most enterprises are losing money they can't see. Manual work that should be automated. Security gaps that should be closed. Systems that should talk to each other but don't. Sentra fixes all three — with one accountable team instead of three competing vendors.

THE PROBLEM

Your teams are drowning in repetitive work, your systems don't talk to each other, and every quarter brings a new security scare. Meanwhile, competitors who solved this are shipping faster and costing less to operate.

THE SOLUTION

Sentra delivers software, automation, and cybersecurity as one integrated engagement. We centralise your operations, automate what shouldn't be manual, and close the security gaps before they become headlines.

THE OUTCOME

Clients typically see $2.1M+ in annual savings, 40% fewer security incidents, and 3× faster product releases within the first 12 months. Payback on our engagement: usually under 6 months.

ONE-MINUTE SUMMARY FOR THE BOARD

What it is: A fixed-scope engagement that replaces manual operations with automated, secure, integrated systems. **What it costs:** Starting from $18K for a scoped assessment; typical full transformations $80K–$280K depending on scope. **What it returns:** Average 6× ROI in year one — measurable in reduced headcount cost, avoided breach liability, and revenue unlocked by faster operations. **The risk:** Minimal — first milestone is guaranteed or you don't pay.

WHAT SENTRA DOES FOR YOU

Seven Services. One Business Outcome.

Each of our services is built to solve a specific, expensive problem your business is already paying for — often without realising it. Here's the plain-English translation.

AI

AI Systems

In plain English: computers that read, write, decide, and answer for you.

THE PAIN

Staff spending hours on email, data entry, and routine decisions a smart assistant could handle in seconds.

WHAT WE DO

Deploy custom AI assistants that handle customer enquiries, internal requests, and document processing 24/7.

THE WIN

Teams reclaim 15–25 hrs/week each. AI handles 80% of repetitive queries at ~$0.02 each.

⇄

Automation

In plain English: stop paying people to copy data between systems.

THE PAIN

Invoicing, onboarding, reporting, CRM updates — all eating your team's week with manual copy-paste work.

WHAT WE DO

Connect your tools so they talk to each other. Work happens automatically, 24/7, with no human bottleneck.

THE WIN

Equivalent of 2–3 full-time employees' work done by software. Typically $150K–$400K/yr payroll freed up.

▪

Custom Platforms

In plain English: software built around how your business actually works.

THE PAIN

You're paying for six off-the-shelf tools that almost do what you need — and staff work around all of them.

WHAT WE DO

Build one platform purpose-designed for your workflow. Internal tools, client portals, full SaaS products.

THE WIN

Fewer subscriptions, zero workarounds, faster team. Typical SaaS bill reduced by 35–60%.

Security Assessment & Auditing

In plain English: find the open doors before someone walks through them.

THE PAIN

You don't know what you don't know. One undiscovered vulnerability can cost $4M+ in breach response.

WHAT WE DO

Map every exposure point, rank them by real business risk, and hand you a clear fix-it list.

THE WIN

Board-ready risk register. Insurance premiums drop 10–20%. Breach liability reduced by an order of magnitude.

⚠

Penetration Testing

In plain English: we hack you first, so the bad guys can't.

THE PAIN

Audits and checkbox scans miss the attacks that actually work. You won't know until it's too late.

WHAT WE DO

Certified ethical hackers run real-world attacks against your systems — and tell you exactly how they got in.

THE WIN

Fix exploitable gaps before attackers find them. Pass SOC 2 and client security reviews without scrambling.

Cloud Security

In plain English: make sure your AWS / Azure / Google Cloud isn't a liability.

THE PAIN

One misconfigured cloud storage bucket has cost companies $100M+. Most teams don't audit their own cloud.

WHAT WE DO

Harden your cloud, lock down access, monitor continuously. Turn your cloud into a defensible asset.

THE WIN

Breach risk drops ~60%. Cloud bill usually drops 15–25% once we remove wasted resources.

Governance, Risk & Compliance

In plain English: pass audits without your engineers hating their lives.

THE PAIN

SOC 2, GDPR, ISO 27001, HIPAA — every audit derails your team for weeks. Clients demand proof.

WHAT WE DO

Build the compliance framework once, embed it in your systems, keep you audit-ready continuously.

THE WIN

Close enterprise deals that require compliance. Audit prep time drops from weeks to days.

A REAL-WORLD EXAMPLE

From Scattered Chaos to One Centralised System.

TYPICAL CLIENT SCENARIO

A 200-person services firm with customer communication everywhere.

Customers were reaching the company through 7 different channels. Nothing connected. Staff manually checked 5 inboxes per day. Leadership had no single view. Response times were slow, conversations slipped through cracks, and no one could answer "how are we doing?" without a spreadsheet war. This is a pattern we fix every month.

BEFORE SENTRA — EVERYTHING LIVES IN ITS OWN SILO

CUSTOMER

WhatsApp Checked by 3 people	**Email Inbox** Ignored 60% of day	**Web Chat** Only during office hrs	**Phone Calls** No call log kept
Instagram DMs Marketing only sees	**Facebook** Ops team misses	**SMS** Personal phone!	**CRM Notes** Out of date

COST OF CHAOS
Staff spend 4.2 hrs/day checking inboxes that should check themselves.

MISSED REVENUE
18% of customer enquiries went unanswered >24h. Many never bought.

BLIND LEADERSHIP
Zero visibility. No reports. No idea which channel drives sales.

AFTER SENTRA — ONE HUB, ONE VIEW, AUTOMATED

Customer
Any channel, any time

→

SENTRA HUB
AI routing · auto-reply · single view

Right Person
In seconds, not days

Unified Inbox Every channel, one screen	**Auto-CRM Update** Customer record always live	**Live Dashboard** Leadership sees everything	**AI Draft Replies** Staff click send, done

THE NUMBERS — YEAR ONE IMPACT

WHERE MONEY WAS LEAKING	BEFORE SENTRA	AFTER SENTRA	ANNUAL SAVING
Staff time checking inboxes	4.2 hrs / person / day	20 min / person / day	**$387,000**
Missed enquiries (unresponded)	18% lost	<2% lost	**$540,000 in recovered revenue**
Overtime & weekend coverage	$8K / month	$0	**$96,000**
Redundant software subscriptions	$3.1K / month across 6 tools	$900 / month, one tool	**$26,400**
TOTAL IMPACT (YEAR 1)			**$1,049,400**

BY THE NUMBERS

What Clients Typically Gain in Year One.

These are realistic ranges drawn from typical engagements in the 50–500 employee band. Your numbers may be higher or lower depending on current operational waste and existing security exposure — we quantify this precisely during the discovery phase.

$2.1M

Average Annual Saving

Across headcount efficiency, recovered revenue, insurance reduction, and software consolidation.

6×

Return on Investment

Typical year-one ROI after a full engagement. Payback usually within 5–6 months.

2,400 hrs

Team Time Returned

Per year, per 50-person operation — equivalent to 1.2 full-time employees redirected to growth.

40%

Fewer Security Incidents

Average reduction in reportable incidents after our security assessment and hardening engagement.

3×

Faster Product Releases

For engineering teams after we automate deployment pipelines and untangle legacy systems.

15–25%

Cloud Bill Reduction

Typical drop after our cloud audit removes wasted resources and right-sizes infrastructure.

WHERE THE VALUE COMES FROM

Reduced manual operations (staff time)	~45% of total saving
Recovered revenue (lost customers, missed deals)	~25%
Avoided breach & compliance liability	~18%
Software & cloud consolidation	~12%

HOW WE WORK WITH YOU

From First Call to Production. In Weeks.

No mystery, no endless discovery phases, no surprise invoices. Every engagement follows the same proven path — so you always know what's happening, what's next, and what it costs.

1. Discovery Call

WEEK 1 · FREE

A free 30-minute conversation with a senior engineer. You describe the problem, we tell you honestly whether we're the right fit and roughly what a solution looks like. No slide decks. No junior rep reading off a script.

2. Scoped Proposal & Business Case

WEEK 1–2

Fixed deliverables, fixed timeline, transparent pricing, and a written ROI projection for your board. You see exactly what you're paying for and what you're getting before anything starts.

3. Build, Secure & Integrate

WEEKS 2–12

Weekly demos of working software. Continuous communication with a named lead. Security is baked in from day one, never bolted on. You see real progress every Friday — never a surprise at the end.

4. Launch & Handover

WEEK 12–14

We ship to production with a clean handover, full documentation, and team training. Your people know how to operate it from day one. No black boxes.

5. Ongoing Support & Optimisation

ONGOING · OPTIONAL

Monitoring, patching, iteration, and continuous improvement. We stay on at a predictable monthly rate — because delivery isn't finished when the code ships, it's finished when it's still working a year later.

✓ **Our commitment:** If the first milestone doesn't meet the specification we agreed on in writing, you don't pay for it. That's how confident we are in our process — and how much we respect your time and budget.

INVESTMENT & PAYMENT STRUCTURE

Transparent Pricing. No Surprises.

Every engagement is quoted with a fixed scope, fixed price, and a milestone-based payment schedule. You only pay when we deliver. Here are our three standard engagement tiers — custom scopes are always available.

ASSESS

For: audits, diagnostics, discovery

$18K — $45K

- ✓ Security or operations audit
- ✓ Full risk & waste register
- ✓ Prioritised roadmap to fix
- ✓ Executive report for board
- ✓ 2 follow-up strategy calls
- ✓ Delivered in 3–5 weeks

MOST POPULAR

TRANSFORM

For: automation, platforms, full builds

$80K — $280K

- ✓ End-to-end design + build
- ✓ Custom software / automation
- ✓ Security hardening included
- ✓ Team training & handover
- ✓ 90 days post-launch support
- ✓ Typical ROI: 6× year one

PARTNER

For: ongoing optimisation & managed ops

$6K / month +

- ✓ Dedicated senior engineer
- ✓ Continuous monitoring
- ✓ Monthly optimisation cycles
- ✓ Priority incident response
- ✓ Quarterly business reviews
- ✓ Cancel any time, 30 days notice

MILESTONE-BASED PAYMENT SCHEDULE — TRANSFORM engagements

20%
KICK-OFF
On proposal sign-off & team assignment.

30%
MILESTONE 1
First working system, demonstrated live.

30%
MILESTONE 2
Full build complete, user acceptance.

20%
GO-LIVE
Production deployment & handover complete.

First-milestone guarantee: *If Milestone 1 doesn't meet the written specification, the 30% milestone payment is waived and the 20% kick-off is refunded. You walk away whole.*

Payment terms: *Invoices are net 15 days. Wire transfer, ACH, or SEPA accepted. We can also contract through your preferred procurement framework. Enterprise agreements available with extended payment terms on request.*

WHY SENTRA

Why Companies Choose Us Over the Alternatives.

One Team, Not Three Vendors

Software, AI, and cybersecurity under one contract. No finger-pointing between suppliers when something breaks — we own the outcome end to end.

Senior Engineers, Not Juniors in Badges

Your engagement is run by a senior technical lead with 8+ years of experience. You never get handed to a rotation of junior consultants.

Fixed Scope, Fixed Price

No hourly billing surprises. You know exactly what you're paying for before we start — and exactly what you'll get when we're done.

First Milestone Guaranteed

If we don't deliver what we said we would at Milestone 1, you don't pay for it. The commercial risk is on us, not on you.

Board-Ready Reporting

Every engagement comes with an executive-level business case, risk register, and ROI projection — suitable for board and investor review.

We Stay After Launch

Most vendors walk away at go-live. Our PARTNER tier provides ongoing optimisation so the system keeps delivering value year after year.

Frequently Asked Questions

Q. How long until we see actual results?

Typical clients see measurable operational improvement within 30 days of Milestone 1. Full financial payback usually arrives between month 4 and month 7.

Q. Do we own the software you build?

Yes. All custom code, documentation, and infrastructure is delivered to you with full IP ownership. No vendor lock-in, no licensing games.

Q. What about security & data handling during the engagement?

We operate under a signed NDA from day one, work in your cloud environment where possible, and follow SOC 2 / ISO 27001 aligned processes. Your data never leaves approved systems.

Q. Can we pilot a small project before committing to a large one?

Absolutely recommended. Most clients begin with an ASSESS engagement ($18K–$45K) before committing to a full TRANSFORM build. It de-risks the bigger decision.

YOUR NEXT STEP

Tell Us The Problem.
We'll Tell You How to Solve It.

A free 30-minute call with a senior engineer. No slide decks, no sales pitch — just a straight conversation about what's slowing your business down and whether we're the right team to fix it. You decide if it's worth a second call.

STEP 01

Reach out

Email or WhatsApp us with a one-line description of your challenge. That's all we need to start.

STEP 02

30-min call

We'll ask smart questions, give you a rough direction, and tell you honestly if we're not the right fit.

STEP 03

Written proposal

If there's a fit, you'll have a scoped proposal with timeline, price, and ROI projection within a week.
